

Connolly Printing strives to be an environmentally-conscious printer utilizing biodegradable, recyclable, recycled materials and wind power. We offer items developed with eco-conscious methods and materials. We use earth-friendly products, including soy-based cleaners and recyclable ink cartridges. We practice energy-efficient production methods. Talk to a Connolly Printing employee about making the correct choices for your marketing needs.

We have purchased renewable energy credits to offset 100% of the electricity we use. Renewable energy credits are produced by wind farms, biomass facilities and other renewable energy projects that allow companies and consumers to offset their electricity use with clean and renewable energy. By working with Connolly Printing, you are supporting clean, renewable energy usage.

☐ Show your support for renewable energy by displaying this logo on your products from Connolly Printing!
